The story focuses on the two brothers, Charles and Lucas McCall, as they join the outlaw Bart Masters and his gang to steal from and brutally assault people in the bustling city of Tombstone. The brothers use their sharpshooter skills to kill people and take their money. As the story progresses, players will explore the area of Tombstone and unlock more of the story. This makes Call of Juarez: Bound in Blood a great game for story-based players who want to experience a story-based title. The game will take place a few months after the events of Call of Juarez: The Cartel. Bound in Blood takes place about a year later in the long-running series. This was done to make the game more fresh and not like the previous title. As a result, the story focuses more on the twins and not the clan and gang, though the clan and gang are still included. Since there are plenty of different areas to visit and interact with, players will not get bored and can explore the city and change the perspective of what is happening. Bound in Blood is a story-based game, but it does not follow the same linear path as other games of this type. Players will not be able to take a single path and explore the town until they get the right guns and gun parts. The game requires skills and tactics and not just the quick draw to kill. Players will have to plan and think ahead. Even though players will learn new gun parts and skills over the game, there are plenty of new mechanics and features. There are several different characters in the game. Each

---

character has their own unique skills and features. One character can be a scout, another can be a sniper, while another can be a heavy gunner. Players will be able to switch between characters to the best one depending on the situation. For example, if you need a sniper character, players can switch over to that character. Players will also be able to switch their weapons to maximize their playstyle. As with different characters, different weapons have their own strengths and weaknesses. Players will also be able to unlock new characters and weapons to use. When the game is complete, players will have over 140 characters, with 15 different types of guns, and over 60 different ways to play. Call of Juarez: Bound in Blood takes place in a frontier town called Tombstone. Tombstone is a busy town that attracts people from all over. The town was founded a few years before Call of Ju
