I can't compare this with any other mode of the JU 87, but for the price, I can't knock it. The cockpit and the exterior have a lot of detail and it's handling is believably sluggish - similar to most of the descriptions I've read.. A boring, overdone experience. Nothing of interest to be seen here, spend your money somewhere else.. This is a lovely little game, which I would describe as more of an interactive storybook. The mechanics are quite simple: you guide a little spirit on her quest to find out who she is and what became of her. The real pleasures here are in the evocative visuals and especially in the beautiful Celtic music. It may be a short game, but I legitimately got a little choked up at some of the endings.. I was surprised at how tense this game can get - and how good it can feel when just the right card pops up and saves the day. I picked it up on a whim after seeing it on Twitter and I'm glad I did. =>. <https://www.youtube.com/watch?v=BHp7dd1uIU>. bought the game a while ago and have only just realised that the cleopatra expansion isn't included, went to the sierra web site and they dont even list the game anymore. Got the game "bundle" through steam but there is no update to solve this problem. Such a shame as is a very good game, just missing the next stage.. --{Mission Difficulty}--

\u2610 Sans

\u2610 You can't beat this unless you grind

\u2611 Grind until ~20-40

\u2610 Beat this easier than Endeavor's wife

--{Price}--

\u2610 Worth the price ten times over

\u2610 Simply, yeah

\u2611 If you enjoy the mission aspect of this game, buy it. Otherwise I would recomend against it.

\u2610 NOPE

--{Actual Content}--

\u2610 Adds an amazing amount of content to the game

\u2611 Adds main DLC plus bonus items for beating the mission

\u2610 Adds one thing

\u2610 Writing this was time I'll never get back

6V10 (A passing score, however be weary purchasing this is you have not played the game yet.). Before I played:

There's probably a modicum of fun to be had playing in local coop, but I would only purchase it if you've already exhausted your other options and only if you are a hardcore D&D fan. Even Dungeons and Dragons Heroes, launched almost 10 years earlier on Xbox would be a more interesting option.. A very cool game, It is fun to play and you get addicted very fast. The difficulty is perfect, not to easy and not to hard. You have to use your brain to get thru some of the maps.

It is a nice story. Don't rush thru the game, take your time and be patient, read the text.

There is alot of trolling in this game.

And I know Veibyn has a great sence of humor so watch out! xP

I love it.

Well done Veibyn! :D

Fun little game, worth picking up on sale if you like simple, cartoon, dungeon crawlers. It has a little zelda feel, but not as advanced and very limited. Easy to pick up and play when you have limited time. Good for most ages. Got it on sale when its already low priced lol.. Best soundtrack for life!

The songs are the memorable tunes from NotGTAV. The money from NotGTAV was donated to charity so they needed to make a DLCV/soundtrack to get some income and this soundtrack is GOLD!

Buy it to support the developers or just to enjoy JACKET POTATO or the mysterious BONUS TRACK that has the best cover of the King of Pop!

I rate this 9/10 because of the great idea of the developers and for the GREAT MUSIC!. Nice maps and good story addition.. Nope, nope. Nope. It can be fun for a goof, but there's no actual game; the controls and tools only make it frustrating and impossible at certain points, which is the only challenge. The game doesn't reward you for succeeding by giving you better tools or higher-paying customers, it only allows you to keep on playing in case you don't fail and spend your money on useless decorations. Feels like it was made specifically for let's play videos, which strikes me as disingenuous. Would make for a fun minigame sequence within some other title.. Don't play unless you like being frustrated. The game is structured in an impossible way. You are literally unable to progress much past the point you start at. Many of the beards are impossible to recreate, due to a lack of tools (choice between giant buzzer and scissors that cut out huge chunks at a time) and shape (some beards don't even fit into the canvas you are given). The rent increases so dramatically that it isn't plausible to ever buy any of the upgrades, such as a new location, new hires, or decorations. In fact, surviving past 15 minutes seems unlikely. On top of all this, the actual game mechanics are sketchy at best. There's no way to see how accurate your trimming was, and the subsequent reward seems random at best. You often get a bigger reward for matching the color alone rather than attempting to trim the beard. I would NOT recommend this game to anyone, though I should mention that my baby sister had a fantastic time giving every customer neon green chest hair until the rent timer ran out and forced her to restart the game.
